

Friday 15<sup>th</sup> December 2023

Dear Parents/Carers of \_\_\_\_\_,

Thank you for your support in ensuring your child can attend their weekly Maths Club.

In the spring term, we are able to increase our offer of this free club to **two sessions a week**. It is important for your child to attend **both** sessions each week, as each session builds on the last.

**From January, Maths Club sessions will run from 3.30-4.30 on a Monday and Tuesday.**

If you have made other club requests, we are able to prioritise allocations for Wednesday and Thursday sessions accordingly to balance these important learning clubs with other clubs of your choice.

During these sessions, there is additional teaching for more challenging areas of the maths curriculum, in line with children's targets for the SATs in May. Children will have the opportunity to increase their fluency, accuracy and confidence in a small group. There are also opportunities to revisit and consolidate prior learning so that children can confidently remember and apply a wide range of arithmetic and problem solving strategies.

**This club will start next week on Monday 15<sup>th</sup> January.** It is important that children attend each session so that they do not miss any valuable support.

We are hugely grateful for all of the support you already give your child at home with their learning, from supervising homework and signing reading records, to testing spellings and times tables. With the extra support we are offering, we hope to help your child to reach their full potential in these assessments so that they leave us confident and ready for the rest of their learning journey at secondary school.

Thank you in advance for your support,

Amy Mpofu

Year 6 Class Teacher

Please tick as appropriate and return to school by **Monday 18<sup>th</sup> December**.

Child's name: \_\_\_\_\_

-I am happy for my child to attend this club to receive additional support.

-I will collect my child at 4.30
